The WEBTech Notes search feature is currently experiencing technical difficulties. As a temporary solution, an Excel document containing the entire WEBTech Notes dataset is available until the full search capability can be restored.

In addition, the July/August 2008 issue of Administrative Notes Technical Supplement (ANTS) is available in print and in pdf formats. The pdf format is posted on the FDLP Desktop with the past issues
while we are working on the Web application (with a search feature). We will keep you informed on our progress.

Thank you for your patience while we work to enhance WEBTech Notes.
