As of December 1, 2008, in response to requests from the depository community, more fields will display in the FDLD. These will include the Library Director's title and name and the Depository Coordinator's name and telephone number. These fields will be available to view, print, and export for both depository library users and for public users.

Thank you for your support as we strive to improve our services to the depository library community and to the public.
