

The FDLP Desktop now includes a separate location for cataloging information. This can be found as a new tab in the top navigation bar, called ["GPO Cataloging"](#). Content from the legacy Desktop's Cataloging & Indexing page has been migrated from PDF into HTML. This content will be undergoing an update by GPO staff in the near future. The original PDF versions, which were published in conjunction with various events, are available in the [file repository](#) under "Events".

With this launch, we have also posted new cataloging information as well. With an increasing number of digital reproductions being created by Federal agencies and by GPO and GPO's partners, GPO's Library Technical Information Services (LTIS) has formulated procedures for [c](#)
[ataloging digital reproductions](#) of a tangible document.
