

The WEBTech Notes search feature is currently experiencing technical difficulties. As a temporary solution, an Excel document containing the entire WEBTech Notes dataset is available until the full search capability can be restored.

In addition, the May/June 2008 issue of Administrative Notes Technical Supplement (ANTS) is available in print and in pdf formats. The pdf format is posted on the FDLP Desktop with the [past issues](#) while we are working on the Web application (with a search feature). We will keep you informed on our progress.

Thank you for your patience while we work to enhance WEBTech Notes.
