These documents will be distributed on Shipping List 2008-0294-P under item number 1004-E. We are providing both SuDocs classification numbers for the documents, House/Senate documents classification and Serial Set classification so that libraries may choose the best shelf location based on local shelving practices. These volumes will not be distributed in microfiche.

These documents will be cataloged as House/Senate documents with serial set and House/Senate document information included as series tracings. GPO will include a "Whatever Happened to ..." entry in a future issue of Administrative Notes, Technical Supplement and WebTech Notes alerting libraries to the two classes used for these titles.
