State Focused Action Plan

This State Focused Action Plan may be completed at the state or Federal depository region/ multi-state region level. It is designed to document what states or Federal depository regions have identified in their individual library and state forecasts as important issues and how FDLP libraries are working together to address these issues through shared initiatives and actions. The completed action plan should present initiatives for all Federal depository libraries within the state or depository region collectively and may contain initiatives for specific library types as needed.

Please provide up to five of the most important initiatives that your state or Federal depository region plans to implement within the next one to five years. These initiatives or goals should be specific and attainable, emphasizing what FDLP libraries in your state or Federal depository region want to achieve. These initiatives may also reflect collaborative efforts across states. Examples of possible initiatives are provided below.

Your responses will help GPO in determining a national strategy for the future direction of the Program. Learning about the state and region level initiatives assists us in determining how best to complement your efforts as we work towards an FDLP National Plan for the future of the Program.

Thank you for sharing your plans with us and helping us to build a stronger FDLP.

Please submit your State Focused Action Plans to GPO no later than **June 30, 2012**.
