- Duplicate copies: choose the best copy and discard the others.
 - Use the designated cart for discard drop-off so [GovDocs](#) can dispose of them properly.
 - Please add to the Duplicate [GovDocs](#) Excel file on our project site.
- Barcoding: always on the item (not the container)
- Don't import 856 or 530 fields from OCLC
 - If the 530 refers to microfilm and not e-resources you can keep it.
- Older editions vs. Newer editions:
 - It's hard to set a policy for revisions and such. If anything, the policy is that we keep all editions of everything, unless it is specifically on the Superseded List (and I'll leave a copy of that downstairs).
 - Review Superseded List and when in doubt, consult Renee Bosman.

Opportunities to Improve WorldCat

Fix Series authority statements

A 5.11: was using Wildlife leaflet, a series title for Interior, not Agriculture

Added authorities for the two prior corporate entries for the series:

Wildlife research and management leaflet (United States. Bureau of Biological Survey)

Wildlife leaflet (United States. Bureau of Biological Survey)

Reconciling OCLC & CRDP records

Compare and then update OCLC as needed, to preserve the best information from both sources.

When we find the point at which the Bureau of Biological Survey was moved to the DOI, we'll update the authority records.
