

# Foreign Trade Data Before the Advent of Online Sources 1790-1990

Steve Belev, Retired Regional Depository Librarian, Oklahoma  
Department of Libraries

Susan Woitte, Depository Librarian, Oklahoma Department of Libraries

**January 13, 2022**

# Formula for finding 200 years of foreign trade data

200 years of data = ASP + FC&N + C 3.164

- a. “ASP” is *American State Papers*, bibliographic volumes 7 and 8
- b. “FC&N” is *Foreign Commerce and Navigation*
- c. “C 3.164” is U.S. Dept. of Commerce’s *Foreign Trade* reports  
(alternate Sudocs number is C 56.210)

# Where can I find these sources?

**Depending on your local and state situation these sources may be available online, in paper format, or microfiche format in your library, nearby depository or non-depository libraries, or from your regional depository library.**

Other factors that may affect your accessing these –

- Sudoc and/or shelf location changes
- Deselection or weeding
- Damage

# American State Papers

Availability: online from Library of Congress, Hathi; paper in your collection, other FDLP libraries including Regionals, non-FDLP libraries; purchased commercial microfiche/microfilm collections. Govinfo may scan these in the future.

Table 1. Schedule A Groupings of Commodities and Method of Transportation—Continued

(For coverage, valuation, and sampling procedures, see General Explanation. Shipments individually valued at less than \$251 are shown only under Schedule A subgroup 990.0 and included in data for all methods of transportation and for vessel and air. Where a description for a division or group code is omitted, the description immediately following the division or group code is applicable. Where the symbol "DO" appears in the description column for a Schedule A code, the description immediately preceding the code is applicable. 2. Less than half of the unit of measurement shown)

Schedule A code	Commodity description	All methods, value (dollars)	Vessel		Air	
			Value (dollars)	Shipping weight (1,000 pounds)	Value (dollars)	Shipping weight (1,000 pounds)

## U.S. EXPORTS

**Schedule E**  
**Commodity**  
**by Country**

U.S. DEPARTMENT OF COMMERCE  
Bureau of the Census

(See "Explanation of Statistics" for information on coverage, definition of f.a.s. export value, security restrictions, sampling procedures, sources of error in the data, OTH CTY (other countries), and other definitions and features of the export statistics. The figure preceding Canada is the number in the sample for Canada. "SC" at the end of the alphabetic commodity description identifies "Special Category" commodities.)

# U.S. Waterborne FOREIGN TRADE

REPORT FT 600

December 30, 1966

## TRADE AREA BY U.S. COASTAL DISTRICT

This report contains data on U.S. waterborne trade, presenting shipping weight information on trade between foreign trade areas and U.S. coastal districts. The report contains information by type of vessel service on exports of domestic and foreign merchandise, general imports, and data for Department of Defense controlled cargo exported under U.S. foreign aid programs combined with Special Category non-Department of Defense controlled cargo. The shipping weight figures shown in this report represent the gross weight of shipments, including the weight of containers, wrappings, and crates.

### Foreign Trade Areas

The foreign trade areas shown in this report are defined in Schedule R, Code Classification and Definitions of Foreign Trade Areas (copies available from the Bureau of the Census). Exports by vessel are credited to the foreign trade area in which the merchandise was unladen while imports are credited to the trade area in which the merchandise was laden.

### U.S. Coastal Districts

The U.S. coastal districts for which information is presented in this report are defined as follows:

- a. **North Atlantic** - Includes ports along the eastern seaboard from the northern boundary of Maine to the southern boundary of Virginia.
- b. **South Atlantic** - Includes ports along the eastern seaboard from the northern boundary of North Carolina to, but not including, Key West, Florida. Also included are all ports in Puerto Rico.
- c. **Gulf** - Includes all ports along the Gulf of Mexico from Key West, Florida, to Brownsville, Texas, inclusive.
- d. **South Pacific** - Includes all ports in the States of California and Hawaii.

- e. **North Pacific** - Includes all ports in the States of Oregon, Washington, and Alaska.
- f. **Great Lakes** - Includes all ports bordering upon the Great Lakes and their connecting waterways as well as all ports in the State of New York on the St. Lawrence River.

### Types Of Vessel Service

In this report information on dry cargo shipments is shown separately for liner and irregular or tramp vessels. Liner service is that type of service offered by a regular line operator of vessels on berth. The itineraries and sailing schedules of vessels in liner service are predetermined and fixed. Irregular or tramp service is that type of service afforded by vessels, other than tanker vessels, which are chartered or otherwise hired for the carriage of goods on special voyages. Vessels in this type of service are not on berth and their sailing schedules are not predetermined or fixed. Tanker vessels are those primarily designed for the carriage of liquid cargoes in bulk while all others are classified as dry cargo vessels.

### Data Presented in Tables In This Report

Tables 1, 2, and 3 of this report present data on exports of domestic and foreign merchandise on liner, irregular, and tanker service vessels, respectively, by trade area and coastal district, showing total amounts carried on all vessels and amount carried on U.S. flag vessels. The statistics in tables 1, 2, and 3 include nongovernment shipments, government financed economic assistance shipments under the Mutual Security Program, and shipments to U.S. civilian government agencies. Shipments of Special Category commodities are not included in tables 1, 2, and 3.

Tables 4, 5, and 6 contain information on general imports of merchandise which represent imports for immediate consumption plus entries into Customs

For sale by the Bureau of the Census, Washington, D.C. 20233. Price 10¢ per copy. Annual subscription \$1.00.

# U.S. EXPORTS

## of Domestic Merchandise

### SIC-Based Products and Area

U. S. DEPARTMENT  
OF COMMERCE  
BUREAU OF THE CENSUS

Table 1. SIC-Based Product Code by World Area: 1966

(See General Explanation for discussion of coverage, security restrictions, and related matters. SIC-based product codes which include Special Category shipments, if any, are identified with an asterisk (\*). For the asterisked commodities, Special Category shipments are not included in the SIC-based product code by area totals but are combined and designated "ALL AREAS SPECIAL CATEGORY" and shown at end of the list of areas for the asterisked commodity.)

# U.S. EXPORTS & IMPORTS BY AIR

FT 785/ ANNUAL 1965

U. S. DEPARTMENT  
OF COMMERCE

BUREAU OF THE CENSUS

CALENDAR YEAR 1965

Exports by Air

Table 1. COMMODITY BY COUNTRY

(The figures in this report reflect fully compiled data for shipments to Canada individually valued \$2,000 and over combined with estimated data for shipments valued \$100-\$1,999 based on a 10 percent sample of such shipments. The figures shown for shipments to countries other than Canada reflect fully compiled data for shipments individually valued \$500 and over combined with estimated data for shipments valued \$100-\$499 based on a 50 percent sample of such shipments. See introductory statement of this report for description of sampling procedure.)

<sup>1</sup>Exports represent shipments of domestic and foreign merchandise combined, excluding Department of Defense (DDO) Military Aids shipments on an f.a.s. (free alongside ship) U.S. port of exportation value basis. General imports represent shipments of merchant insurance, and freight) U.S. port of entry value basis and on a Customs value basis.

JANUARY 1982

U.S. EXPORTS

33

Table E-3. Domestic and Foreign Merchandise-World Area and Country of Destination  
(I.a.s. Value Basis): 1982 and 1981—Continued

(In millions of dollars. See "Explanation of Statistics" for information on coverage, definitions of export valuation, sampling procedures, and sources of error in the data. Special Category condition, if any, are included in totals for individual countries and world areas. Developing countries include Canada, Western Europe, Japan, Australia, New Zealand, and the Republic of South Africa. Developing countries include the rest of the world excluding communist areas in Europe and Asia. The assignment of countries generally follows that made by the United Nations. Dash (-) represents zero. A-NOT applicable. Values less than one-half of rounded unit)

## IMPORTS AND EXPORTS, BY PRINCIPAL COUNTRIES

[In thousands of Straits dollars; bullion and coin included]

Country	Imports			Exports		
	1921	1922	1923	1921	1922	1923
Total	502,066	470,983	593,414	433,006	500,130	674,693
United States	27,655	17,240	18,413	99,149	187,141	273,244
Dutch East Indies	98,699	117,285	198,595	112,797	90,349	82,489
United Kingdom	95,142	76,246	81,877	64,385	54,411	93,296
Siam	50,750	64,151	70,394	23,708	21,715	22,847
British India	59,479	52,553	54,308	21,132	23,226	28,527
Hongkong	46,478	35,613	40,780	19,861	13,364	15,636
Japan	22,615	18,147	18,143	18,144	16,419	29,554
China	29,026	21,273	25,831	5,022	8,534	7,540
France	3,680	3,306	4,649	11,213	17,701	25,311
Other	68,542	65,169	80,424	58,195	67,260	96,249

Cigarettes, motor vehicles, lubricating oil, condensed milk, machinery, woodenware, and ironware are the chief imports from the United States. The principal exports to this country are rubber and tin (over 96 per cent of total in 1923). The remainder is chiefly gums, rattans, and pepper.

**Government finance.**—Public debt, December 31, 1922, 159,922,000 Straits dollars. Actual revenue, 1923 (Straits dollars): Federated Malay States, 63,952,000; non-Federated Malay States, 18,613,000. Actual expenditure, 1923 (Straits dollars): Federated Malay States, 52,826,000; non-Federated, 14,485,000.

**Currency and exchange.**—Monetary unit, Straits Settlements dollars; par value, \$0.5678. Average exchange rate: 1922, \$0.5078; 1923, \$0.5350; 1924, \$0.5125.

## DUTCH EAST INDIES

## ECONOMIC REVIEW

The year 1924 resulted in economic improvement in the Dutch East Indies. Increased native production of export crops was an important feature as the profits from native ventures remain in the islands. Output of rubber was increased by improved methods of native production and rubber prices advanced. The sugar crop was of record size, and the tobacco crop was large and of excellent quality. Demand for sugar, tea, and coffee increased and a large volume of future sales were reported. The improvement of tin prices was also most advantageous.

The volume of trade of Netherlands India is more constant than that of most other countries, as a great variety of agricultural commodities are produced for export and a large supply of certain necessities of life are required for consumption. Exports were in large volume during 1924 and import business increased in the latter part of the year, as stocks of merchandise had been reduced to small dimensions. Government finances improved as a result of economy in administration and increased energy in the collection of back taxes; a revision of the tax system was made in consequence of the concerted efforts of business agencies. The exchange rate returned practically to par at the close of the year, removing a handicap to American imports.

## STATISTICAL DATA

**Area.**—Total, 733,646 square miles; Java and Madura, 50,746; outer possessions, 682,900.

**Population.**—Census, 1920: Total, 49,351,000; Java and Madura, 34,984,000; outer possessions, 14,367,000. Principal cities: Batavia, 253,818; Soerabaya, 192,190; Semarang, 158,036; Soerakarta, 134,285; Djokjokarta, 103,711.

## TEXTILES: COTTON GOODS

493

foreign market for United States cotton cloth, increased its purchases from 70,004,000 square yards in 1926 to 79,995,000 square yards in 1927, the latter figure being more than three and one-half times the exports to Cuba in 1913. Exports to South America aggregated 119,817,000 square yards in 1927, which was 2 per cent more than in the preceding year and more than twice as much as in 1913. Shipments to Central America, which totaled 60,398,000 square yards in 1927, were 14 per cent greater than in 1926 and were much larger than before the war. Canadian purchases, amounting to 62,984,000 square yards in 1927, showed a marked increase over those of 1926 and were more than double the 1913 figure. China, British India, and Aden took relatively small quantities in 1927 compared with pre-war shipments. The expansion of native cotton-manufacturing industries in British India and China and the competition from Japanese goods have seriously reduced United States cotton-cloth sales in the Far East.

## Principal Classes of Cotton Cloth Imported.

United States imports of cotton cloth increased in quantity from 60,680,000 square yards in 1926 to 63,002,000 square yards in 1927, but declined in value from \$16,258,000 to \$15,596,000. The average unit price of cloth imported was 24.8 cents in 1927, compared with

## WOOL AND WOOL MANUFACTURES

**SUMMARY.**—Raw-wool production in the United States was estimated at 328,137,000 pounds in 1927, an increase of 5.7 per cent over 1926. Imports of wool totaled 264,430,000 pounds, or 17 per cent less than in 1926. Reexports of foreign wool amounted to 10,711,000 pounds, a decrease of 24 per cent, compared with 1926. Reported consumption of wool, based on returns from mills estimated to represent about three-quarters of the entire wool-manufacturing industry, reached 477,118,000 pounds, an increase of 9 per cent over 1926. Activity of wool machinery showed slight changes in 1927 as compared with 1926. Operation of woollen spindles and narrow looms increased, while that of worsted spindles and wide looms declined. Carpet and rug loom activity was 64 per cent of single-shift capacity in both 1926 and 1927. Prices of raw wool declined slightly from February to May and advanced gradually in the latter half of the year. Yarn prices followed the general trend of wool prices, while cloth prices were fairly steady throughout 1927.

<sup>1</sup> Special administrative districts (S. A. D.) included in figures for Provinces and territories out of which they have been taken.

<sup>2</sup> Figures include Chingchao Metropolitan District (Peking).

Kiangsu Province, in which Shanghai is situated, has a population density of 875 to the square mile, greater than any other area in China, but for the semi-arid lands of Mongolia, Sinkiang, and Tibet the density is only 2 to 5 per square mile.

The following statement gives the population of important metropolitan centers (including outlying hsien area of each) as estimated by the Chinese post office. Many large cities with considerably more than 100,000 population are not listed.

Amoy.....	400,000	Hankow area:	Peking (Chingchao	
Antung.....	304,319	Hankow.....	Metropolitan District)	4,014,619

**Colony of Hong Kong.**—The British Colony of Hong Kong is situated off the southeast coast of China and includes the island of Hong Kong and territory on the adjoining mainland. The area of Hong Kong Island is 29 square miles and that of the whole colony is 391 square miles. Less than 70 square miles of the total are cultivated.

In 1926 the total population of the Colony was estimated at 874,420, of which 857,920 were Chinese and 16,500 British or foreign residents. According to the census of 1921 the total population was 625,166 and the population of Hong Kong Island 542,003. Victoria, the principal business center, is on Hong Kong Island.

<sup>1</sup> Reported in original as "rice and paddy," 1920 to date.

<sup>2</sup> Includes 58,000 pounds imported from Asiatic Russia.

<sup>3</sup> Reported exports from Taiwan to Japan on basis of cleaned rice.

<sup>4</sup> Reported exports from Taiwan and Chosen to Japan, on basis of cleaned rice.

<sup>5</sup> Not available.

SOURCE: Annual Returns of Foreign Trade of Japan.

When the price of Japanese rice is considered too high, foreigners, especially Chinese and Siamese resident in Japan, may resort to the use of millet as a substitute, but the natives even of the poorer classes feel that they must have rice for their daily food.

Before importing rice from foreign countries Japan first makes up as much of its deficiencies as possible from its own colonies—Chosen and Taiwan. During the period 1909-1913 Japan imported an average of 182,000,000 pounds from these two dependencies and an extra 656,000,000 pounds from foreign countries—the total being 838,000,000 pounds.

The yearly imports of the past five years have been as follows: From Chosen and Taiwan, 928,000,000 pounds; from foreign countries, 676,000,000, a total of 1,604,000,000 pounds.

The total imports in 1924 alone amounted to nearly 2,500,000,000 pounds. The net imports that year as well as in 1922 were over a billion pounds, or nearly twice as much as the average net importations during pre-war years.

Beginning with 1921, an appreciable amount of rice has been imported each year from the United States, the average of the four years 1921-1924 being 72,000,000 pounds, or about 4 per cent of the total imports.

In 1922 the United States exported to Japan 99,000,000 pounds of cleaned rice and nearly 20,000,000 pounds of broken rice. The Japanese statistics do not show any imports of rice from the United States, but record 154,000,000 pounds under "All other countries." It is quite probable that the bulk of this particular rice came from the United States.

## EXPORTS

During the pre-war years about 18,000,000 pounds of rice were shipped by Japan to the United States, 34,000,000 to Hawaii, and 27,000,000 to Europe. The average shipments to these same countries
